**Dear Collector,**

This selection of precision die-cast features over a hundred models, some 20% of them now released direct to collectors for the first time.

In this, the 50th Anniversary year of the Corgi name, we are naturally marking the occasion with some special Limited Editions. Among the 1:76 scale Original Omnibus range, there are two Limited Editions which specifically mark the Anniversary, issued in editions of exactly 2,006 pieces. There are also two 1:50 scale Limited Editions in our flagship 1:50 scale Hauliers of Renown series, again limited to just 2,006 models.

Corgi is not alone in celebrating a milestone anniversary. 150 years of the renowned Foden marque are recognised by the issue of a three-piece set that includes the newly tooled Foden Alpha. And 70 years of Pollock of Musselburgh are marked by the issue of a range of period vehicles from the firm's fleets of the 50s, 60s and 70s.

As in recent selections, I have again included a range of models from the Days Gone, Vanguards, and Trackside series, which have proved popular with Corgi collectors. Formerly produced by the Lledo company, these models have been assimilated comfortably into the Corgi 'stable', and our considerable investment in new tooling has ensured that the standard of new models within these ranges will surpass what has been achieved before.

I hope I've managed to include something you'll want to add to your own collection

The Roe trolleybus featured here in T.R.T.B. livery entered service in June 1950, originally with an ELC body, converted in the early 1960s to the Roe body. T.R.T.B. ceased to exist when absorbed by the new Teesside Municipal Transport in 1968.

## 150 Years of Foden: the company's origins

Hancock & Foden was formed originally to build agricultural machinery and steam engines. Edwin Foden diversified into steam traction engines and, in 1901, introduced a successful steam lorry. With the decline of steam and the growing dominance of the internal combustion engine, it was time to change, and when the Board failed to agree, ER Foden left in 1932 and set up his own company, ERF. The first Foden diesels came on stream in 1934. In 1935 William Foden was persuaded to return to the company, which went on to become one of the most successful truck builders in our history.

Many of the models include realistic loads relevant to the vehicle, and the range has now been extended to include a range of period light delivery vans.

# Collectables | Corgi Collection

The Corgi Collection provides an enjoyable and affordable way to build up a little history of warfare in the 20th Century. Featuring both military aircraft and land fighting vehicles, it also extends to civil aircraft, providing a parallel and contrasting theme. Produced from new tooling for 2006 and now issued direct to collectors for the first time, the fearsome King Tiger Tank reproduces a weapon from the dying days of WWII.

**Hawker Hurricane Mk1 - Douglas Bader** ⚡  
Though he had lost both legs in a flying accident in 1931, Douglas Bader returned to the RAF in 1939 and commanded the first RAF Canadian Fighter Squadron. The model replicates the Mk1 Hurricane flown by Bader.  
**Ref: CS90467 £4.99 Wingspan 106mm**

26

**DH Mosquito FBVI - 45 Sqn RAF** ⚡  
Built mostly of moulded plywood, the Mosquito was an unusually fast aircraft, and therefore ideal as a pathfinder, for it could outrun the enemy night fighters on the home run. It was one of the most potent of night weapons in WWII.  
**Ref: CS90472 £4.99 Wingspan 117mm**

**Spitfire Mk1B - George 'Grumpy' Unwin** ⚡  
Flight Sergeant George Unwin flew both over Dunkirk and in the Battle of Britain; during the latter he shot down three Messerschmitt Bf109s. The Mk1B differed from the IA in that the armament introduced a 20mm cannon into each wing.  
**Ref: CS90460 £4.99 Wingspan 102mm**

**Stuart Tank 'Bellman' - Desert Rats** ⚡  
A fast, light tank, the too-lightly armoured Stuart proved no match for the new generation of panzers. 'Bellman' served with the 7th Armoured Division, known as the Desert Rats for their badge picturing a jerboa.  
**Ref: CS90475 £4.99 Approx. length 70mm**

**King Tiger Tank - Hungary** ⚡  
This model reproduces one of the most fearsome vehicles of World War Two. Developed to counter the dreaded Soviet KV-1 heavy tank, the Tiger was used more often as a mobile heavy artillery piece than as an attack tank.

Add a Tiger to your Corgi collection

**Messerschmitt Bf109E - Helmut Wick** ⚡  
The Bf109E was the aircraft that spearheaded the Luftwaffe's aerial Blitzkrieg across Europe, from the outbreak of war until the summer of 1940.  
**Ref: CS90457 £4.99 Wingspan 98mm**

**Junkers Ju-87 Stuka - 'T6+HL'** ⚡  
Possibly the most feared weapon of the Luftwaffe across all Europe in the first three years of the war, the Ju 87 Stuka was deadly accurate, but its relatively slow speed rendered it highly vulnerable to enemy fighters.  
**Ref: CS90473 £4.99 Wingspan 106mm**

**Junkers Ju-87 Stuka - Tropical Camouflage** ⚡  
With its vertical dive capability, the Stuka proved to be an exceptional anti-tank attack aircraft. The Stuka was lethal to the Russian tanks in the early stages of Operation Barbarossa.

The first Corgi scale model of the Simon Snorkel appeared in September 1964, with a Bedford chassis, and was made to 1:48 scale. It continued to thrive in the market for some 12 years, selling over 1.1 million models. Simon's SS263 Hydraulic Platform of 1973, on a Dennis chassis, was first cast by Corgi in 1977, and featured plastic booms with black nylon side ladders attached. And here it is again, marking Corgi's 50th Anniversary.

Limited Edition quantities correct at time of going to print and may be subject to alteration. Certain models photographed in this catalogue are hand finished prototypes. The final quality of factory-produced models will be superior. All measurements are approximate. Corgi reserve the right to improve and amend specifications on all models.
