

Model Car Selection

2010/2011

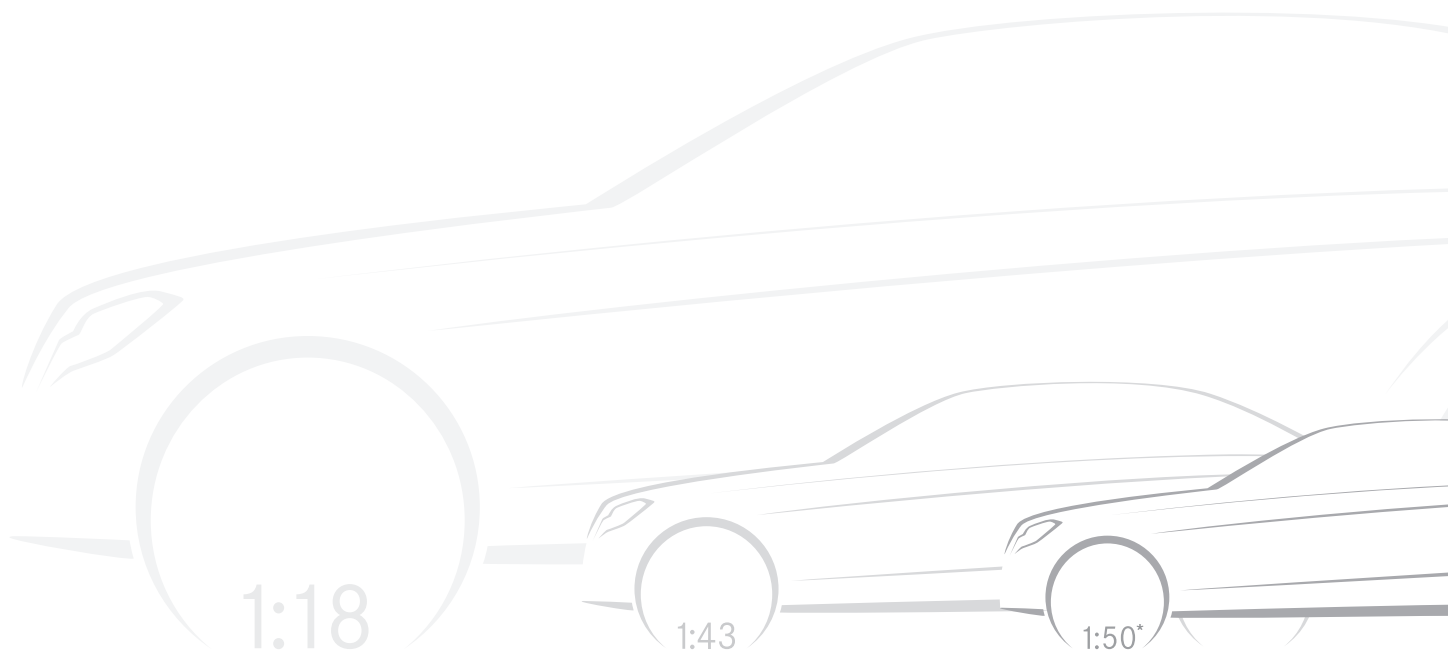

Mercedes-Benz

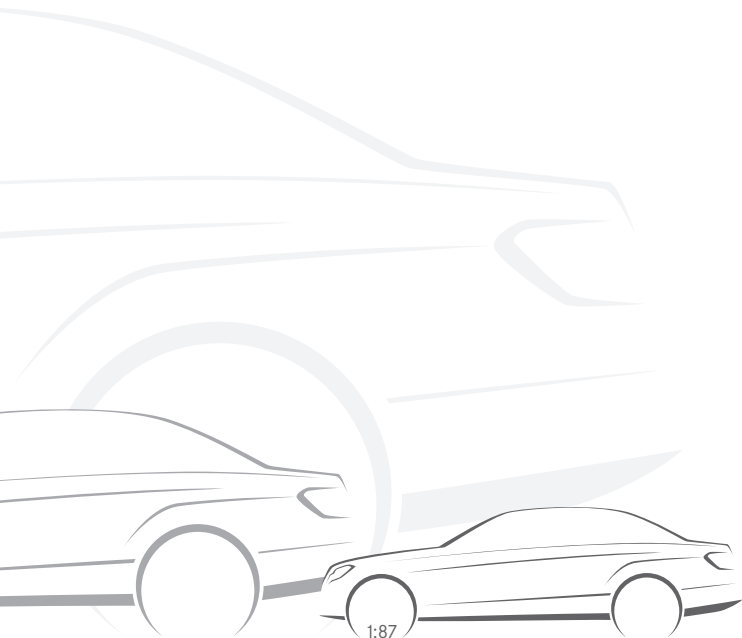

Rediscover the world of cars: from a collector's perspective

The biggest of dreams can be captured in miniature. Take our Mercedes-Benz model cars. Everyone starts small – and with model car collectors that's the way it stays. Your memories of your very first genuine collector's item include all the minute details and carry a thrill that lasts a lifetime. Whether car, truck, classic vehicle or children's toy – every Mercedes-Benz model car has its own unique character, shaped by a multitude of details.

Take home a little piece of automotive passion. Enjoy getting to know the Model Car Selection 2010/2011.

*Examples of this scale can be found in the Commercial vehicles section

Size is always a question of perspective

The vehicle outlines here help you compare the scales used for the Mercedes-Benz model cars, making it easier to decide on your favourite model.

Classic models	52
Children's models	82

Those characteristic details that mark out a genuine Mercedes

Whether full-size or miniature, the high standards of the Mercedes-Benz brand can be recognised in the quality and in the wealth of tiny details. The original CAD data for the full-size vehicles is used as a basis for designing the current model cars, ensuring that the bodywork and interior are replicated as precisely and as accurately as possible. The latest model cars are also developed in close collaboration with the Mercedes-Benz Design department, helping to deliver the quality that you expect of Mercedes-Benz, even in miniature.

When it comes to the paintwork, the genuine colour charts have been used as a basis to produce virtually identical colour matches. See for yourself – an overview of the colour palette for the current model cars can be found on page 91.

Attention to detail, development time, meticulousness, quality – all of these factors turn each model car into a genuine Mercedes-Benz.

Please note that this brochure represents a snapshot of the range as it stood at the time of going to press. Developing new models is an ongoing process, and new miniatures are introduced to coincide with the market launch of their larger counterparts. Your Mercedes-Benz partner will be happy to tell you about new additions for your collection.

The genuine article, from design to colour: the colour palette for the model cars

The paintwork is a car's calling card, even in miniature. Mercedes-Benz model cars come in a unique variety of colours which are virtually a 100% match for the genuine paintwork of the series-produced vehicles. We're sure you'll agree that the results are impressive.

All items are available from your Mercedes-Benz partner. You can also look up our website: www.mercedes-benz.com/collection

As at: June 2010. Note concerning the information given in this catalogue: after going to press, there may possibly be some changes to the products listed in this brochure. The details given in the catalogue are approximate only. Slight deviations in colour are due to the tolerances of the printing process.
